

Day	Date	Time Start	Time End	Duration	Format	Part of Day	Session Type	Topic
Day 5	Jul 12, 2026		9:00				Check-in	Confirm Pitch Slot
Day 5	Jul 12, 2026	10:00	10:15	15 min	Main Session	Morning	Briefing	Judge Briefing
Day 5	Jul 12, 2026	10:15	12:15	2 hrs	Main Session	Morning	Judging	Round 1 — All confirmed teams pitch in parallel across 11 tracks
Day 5	Jul 12, 2026	12:15	13:15	1 hr	Main Session	Afternoon	Break	Lunch + Score Tabulation (Round 1)
Day 5	Jul 12, 2026	13:15	14:15	1 hr	Main Session	Afternoon	Judging	Round 2 — Top 5 per track pitch in parallel
Day 5	Jul 12, 2026	14:15	14:45	30 min	Main Session	Afternoon	Break	Score Tabulation + Finalist Announcement
Day 5	Jul 12, 2026	14:45	16:00	1.25 hrs	Main Session	Afternoon	Finals	Finals — Top 1 per track showcase
Day 5	Jul 12, 2026	16:00	16:30	30 min	Main Session	Afternoon	Ceremony	Awards Ceremony
Day 5	Jul 12, 2026	16:30	17:00	30 min	Main Session	Afternoon	Ceremony	Closing Ceremony

Win the room in five minutes

A practical Round 1 pitch workshop

20 min sharing • 10 min discussion

5

MINUTE PITCH

+ 2 MIN Q&A

Your pitch has one job

Make judges...

UNDERSTAND the problem

SEE the agent work

BELIEVE the outcome

TRUST the team

Clarity
beats
coverage.
e.

Design the story around the rubric

01 Agentic AI use

Does it plan, reason, use tools and act?

03 Technical execution

Is it functional and credible?

05 Creativity

Why is this approach different?

02 Problem / track fit

Does the team understand the real problem?

04 Impact / usefulness

What becomes measurably better?

06 Pitch / demo clarity

Can I follow and remember it?

Give every second a purpose

Rehearse to 4:45. Keep 15 seconds of safety.

Open with identity, relevance and a hook

WE ARE

[Team]

WE BUILT

[Project]

For [target user], we deliver

[valuable outcome]

by using an AI agent to

[distinctive action].

Credibility line

Domain expertise × AI engineering × Product strength

Show insight—not a copy of the brief

WHO	A specific user
GOAL	What they need to achieve
FRICTION	Where the workflow breaks
ROOT CAUSE	Why current options fail
EVIDENCE	What you learned or measured

**“We discovered...”,
not
“The brief says...”**

One insight is worth more than five generic statistics.

Show the agent doing the work

If judges cannot see the decision and action, they may see only a chatbot.

Translate every feature into user value

DON'T STOP AT

SO WHAT?

Multiple agents

Specialists divide and validate the workflow

API integrations

The task is completed across tools users already use

Automated reports

Scattered inputs become a decision in minutes

Complete the sentence: "This matters because..."

Prove it works without teaching the stack

Show only the choices that build belief

REAL

End-to-end workflow

RELIABLE

Validation + recovery

CONTROLLED

Permissions + approval

EVALUATED

Representative test cases

Architecture is evidence—not the main character.

Use the strongest evidence you actually have

4 PILOT RESULTS

Measured with target users

3 USER TESTS

Observed tasks + feedback

2 BENCHMARKS

Representative scenarios

1 ASSUMPTIONS

Estimated and clearly labelled

Measure: time • cost • errors • completion • access • satisfaction

A one-minute demo needs a storyline

Skip login, setup and navigation. End on the user outcome.

Six slides can carry the whole pitch

01

TEAM + PROMISE

02

PROBLEM INSIGHT

03

AGENTIC WORKFLOW

04

WHY IT WINS

05

EVIDENCE + IMPACT

06

DEMO + CLOSE

The deck supports the story. It should never compete with the speaker.

Collect the questions before answering

ASK

“Could we collect the judges’ questions first?”

Note → group → answer in order

0:20

collect

1:20

answer

Direct. Supported. Honest.

1**ANSWER**

Lead with the conclusion.

2**SUPPORT**

Give one fact or example.

3**CONNECT**

Return to user value.

Not sure? Say what is unvalidated, what you know, and how you will test it.

15–25 seconds per answer

Prepare the pitch judges can score

- 1** **WRITE** one sentence per rubric criterion
- 2** **CUT** anything that does not build belief
- 3** **RECORD** a 60-second outcome demo
- 4** **REHEARSE** to 4:45 with hard questions

Questions—or which part of your pitch should we pressure-test?

Six questions your pitch must answer

AGENTIC AI	What does the system plan, decide, use and execute?
TRACK FIT	Who has the problem, and what did you learn?
EXECUTION	What proves the workflow is functional?
IMPACT	What becomes measurably better?
CREATIVITY	Why is this approach meaningfully different?
CLARITY	Can judges retell the story afterward?

Prepare evidence before judges ask

- A1

Agentic workflow
- A3

Safety + human oversight
- A5

Impact / ROI calculation
- A7

Evaluation results

- A2

Technical architecture
- A4

User research
- A6

Alternatives
- A8

Roadmap + limitations

Answer first. Show the appendix only as supporting evidence.

Rehearse the questions that test credibility

AGENT	Why an agent? What decisions? What tools?
PROBLEM	Who validated it? What alternatives exist?
TECH	What is real? What fails? How is data protected?
IMPACT	Where do the numbers come from? Who tested it?
DIFFERENCE	Why can't a general assistant do this?

Final rehearsal checklist

- ✓ Names + track are visible
- ✓ Problem insight has evidence
- ✓ Agent planning and tool use are explicit
- ✓ Technical claims match what works
- ✓ Impact is measured or clearly labelled
- ✓ Demo is ≤ 60 seconds
- ✓ Demo ends on the outcome
- ✓ Pitch finishes by 4:45
- ✓ Appendix is numbered
- ✓ Q&A owners are assigned

A reusable five-minute script

0:00	We are [team]. We built [project] for [track]...
0:40	[User] struggles to [goal] because [root cause]...
1:20	Our agent [plans], [uses tools], [acts] and [verifies]...
2:20	Unlike [alternative], we [differentiator]...
3:05	Our evidence shows [measured / observed result]...
3:50	Demo: goal → agent action → user outcome...
4:50	With [project], [user] can [outcome]...
